

Gesture Controlled Robotic Car

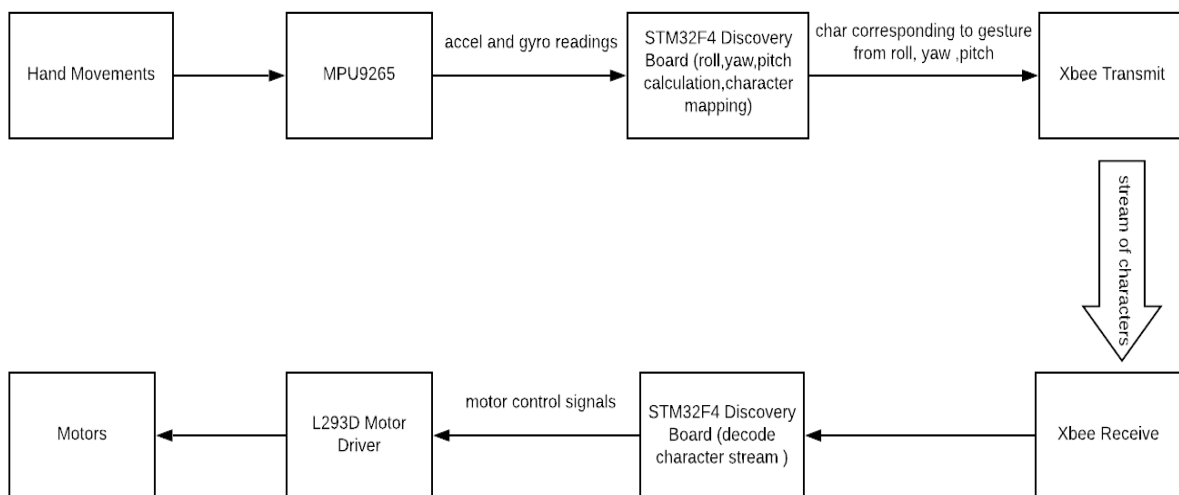

Aim: To control the robotic car using hand-mapped gestures via Xbee pro module.

Components:

- 1) MPU9265
- 2) Xbee pro modules
- 3) Stm32f4 discovery board
- 4) L293D Motor driver module
- 5) DC Motors

Design:

The proposed design is based on the flow of the given block diagram.

| Hand Gesture | Corresponding Character Mapped | Robotic Car Movement |
|--------------|--------------------------------|-----------------------|
| Downwards | ‘B’ | Continuous Forward |
| Upwards | ‘b’ | Continuous Backward |
| Tilt Right | ‘C’ | 90 deg Backward Right |
| Tilt Left | ‘c’ | 90 deg Backward Left |
| Steady | ‘s’ | Stop |
